

Mail Manager Full Service Mail-Preparation Software

A Comprehensive Solution for Top-Tier Mailers.

For 30 years, BCC Software has delivered advanced postal technology products to professionals of every size and specialty. BCC's new **Mail Manager Full Service™** is designed to exclusively meet the needs of premier-level mailers: high-volume operations requiring maximum flexibility in a powerful, all-in-one solution.

Mail Manager Full Service includes as standard features a comprehensive array of BCC mailing innovations—from deluxe automation capabilities that enable true 24/7 unattended processing of specified tasks or complete mailing jobs, to full palletization support, enhanced merge/purge functionality and much more. These features are further augmented by a proprietary address-matching API that delivers processing speeds many times faster than the industry-standard address matching engines.

The foundation of Mail Manager Full Service is BCC's acclaimed Mail Manager core technology, long respected for its intuitive flexibility and remarkable ease of use across the widest variety of mailing applications. This ever-evolving USPS® CASS™/PAVE™ certified platform, coupled with BCC's unlimited best-in-class Customer Support, has earned the confidence of a generation of professional mailers. Now, Mail Manager Full Service takes that promise an important step further.

Features and Benefits

- Proprietary address-matching API that delivers **dramatically higher processing speeds** than the industry-standard USPS matching engine—fast enough to meet the most demanding throughput requirements

Mail Manager Full Service: The Premiere Mailing Solution.

With three decades of mailing industry experience, state-of-the-art technology innovations and an unequalled commitment to customer support, BCC Software is an ideal partner for top-tier mailers looking to maximize their output and efficiency.

Key Mail Manager Full Service Features include:

- Supports Intelligent Mail, POSTNET™, CODE 128 and other barcodes
- Supports First-Class™, Standard and Periodicals, and most preparation methods
- Generates required postal documentation, plus production and management reports
- Powerful data manipulation capabilities, including user defined program functions
- Geocoding, radius select and distance calculations
- Integrated postage statements (plant verified, drop shipment)
- Imports from and exports to most data file formats, including SQL
- Supports container tag and pallet label generation
- Background, multithreaded processing
- Supports industrial inkjet formats, Windows printers, many legacy line printers and most desktop direct imaging printers
- Integrated user defined reports, including totals and subtotals

Recommended Options and Accessories

Mail Manifesting for Bound Printed Matter—This option lets users process non-identical size and weight pieces in a BPM mailing—typically, catalogs, books and other material weighing between 1 and 15 pounds. Mail Manager Full Service already includes mail manifesting functionality for First-Class and Standard Mail®.

Track N Trace® Reseller Site—This option enhances BCC's mail-tracking service by allowing subscribers to offer USPS® OneCode Confirm® delivery monitoring from a secure Web site branded with their own company logo and other information.

Residential Delivery Indicator—This option lets you easily distinguish between business and residential addresses within a list, helping you avoid residential delivery surcharges by verifying delivery type status prior to shipping while identifying shipping patterns to improve operational efficiency. (Separate fees apply.)

Professional Services—BCC's Professional Services team can supplement your phone- and Web-based Support with on-site assistance on process analyses, software optimization, postal issues and more.

For additional details about these or any BCC Software offerings, contact a BCC Product Specialist at **800.453.3130**. Just let us know: **How Can We Help?**
